

# SOHO NVMe

## Touch Duplicator Quick Start Guide

### Interface Description

START

Plug in the power supply and turn on the power switch on the back.

All interface connectors are powered off at this time to prevent short-circuit upon inserting an NVMe SSD.

1

2

Insert the master disk into the SOURCE port and the target disk into the Target port.

COPY

Press the Copy button on the touch screen to begin copying

3

4

The green LED light will flash during the copy process. Upon completion, the green LED light will remain steady. If an error has occurred, the LED light will be a steady red instead.

COMPARE

ERASE

FORMAT

Select other Function from the touch screen to start a different function.

5

Completed

#### ※ Warning

1. **DO NOT** plug and unplug from duplicator during the execution process. It may cause damage to the duplicator system and SSD.
2. The capacity of the target disk should be equal to or bigger than the source disk capacity.
